FROM HESITATION TO ACTION

an AI-powered emergency guidance app for basic life-support assistance

COMMUNITY PROBLEM

In public spaces, bystanders often hesitate to act during medical emergencies.

WHY THIS MATTERS

350,000+
annual out-of-hospital cardiac arrests

7,000+
lives claimed by choking annually

<10%
survival to hospital discharge

40%
feel confident performing the Heimlich

PROPOSED SOLUTION

An AI-Guided Mobile App for Real-Time Basic Life-Support Assistance

HOW IT WORKS

Real-Time AI Decision Support

1 EMERGENCY ACTIVATION
Calls 911 Immediately

2 CAMERA ANALYSIS
Monitors Victim & Responder

3 POSE ESTIMATION
Tracks Hand & Body Position

4 REAL-TIME FEEDBACK
Corrects Errors Instantly

5 SAFETY FALLBACK
Audio-Only if Confidence is Low

80% confident

AI ADVANTAGES

- ☑ Real-Time Corrective Guidance
- ☑ Works Offline
- ☑ Error Detection Safeguards
- ☑ Designed to Work in High Stress

TARGET AUDIENCE

Families | Service Staff | Teachers | Caregivers | The Public

RESPONSIBLE AI

- ☑ On-Device Processing
- ☑ Privacy Protection
- ☑ Medical Safety Overrides
- ☑ Tested in Simulated Emergencies

Track I: Presidential AI Challenge
Supports national emergency preparedness and responsible AI innovation.
